

Immediate Fire Area

The Building Designed by I.M Pei

Forensic Damage Consultants LLC was assigned by the carrier to evaluate the loss. Using our soot tracing protocols, Forensic Damage Consultants LLC obtained over 60 samples on three floors.

A laboratory determined the type and quantity of soot in each sample. A map was prepared indicating the area affected by the fire loss. Calculations were prepared and submitted for settlement. The final structural cost including reconstruction was settled using Forensic Damage Consultants findings.

Forensic Damage Consultants is your team member to determine the actual extent of a soot or smoke loss.
